Cush n Shade® is a novel sun protection product with innovative features not previously available in the leisure market. The Cush n Shade® combines, for the first time, a cushion and a sunshade your guests will use as a stand-alone pillow/shade on the beach or attached to most loungers.

In addition, guests will benefit from 50+ UPF sun protection unlike most umbrellas. The carry strap cleverly wraps around any size sun lounger, keeping you Cush n Shade® securely in place. Ideal for reading in the sun while the rest of the body is tanning.
